## Product range

### Riverstone

Riverstone is a grey/green phyllite roofing slate with a subtle green tinge. Our totally unique roofing material from Argentina which creates a naturally beautiful roof. Great alternative to the indigenous IRISH Killaloe slates for RESTORATION Projects.

### Del Carmen

Del Carmen is a high quality slate with a distinctive faintly-rippled riven texture, deep blue-black colour and characteristic longitudinal grain, which adds a truly spectacular style to any roof. Darker alternative to old Blue Bangor slates.

### Domiz

Domiz is premium slate which is durable and gives a beautiful textured finish to your roof. Its distinctive natural colour, texture and grain make it suitable for coastal and severe exposure areas. Matches Irish Ahinney and Binn Dubh slates & Welsh PORTMADOC slates.

### Silverstone

Silverstone slate has a deep blue-black colour with a distinct blue tinge in sunlight, and is attractively speckled with inert mineral inclusions. Ultra light material, making it a contractor's favourite.

### Sarria

Sarria is unique blue-black slate with visible mineral inclusions, which is exceptionally uniform offering a very smooth appearance.

## Selections and thicknesses

### Ultra (5-6mm)

PRE-SORTED for maximum consistency of thickness and flatness achieving a stunning slate roof finish; suitable for mansard and steep pitched roofs where slate weight and roof timber dimensions are a concern. Looks beautiful.

### Firsts (5-6mm)

Minimum SORTING required. Highly consistent thickness and very regular flatness for an excellent roof finish. Best suited in regions of Moderate Exposure. Ideal for steep pitches with no foot traffic or where weight might be a concern. Slim shadow line and beautiful appearance.

### Celtas (5-7mm)

Customary SORTING & Grading recommended. Moderate variations in thickness and flatness providing an attractive textured finish. Popular in rural Ireland for New slate roofs and RESTORATION of traditional slate roofs. Loved by Slating Contractors. Easily fixed and least waste.

### Heavy (7-9mm)

Strong robust slates. Achieve a solid long lasting slate roof. Using smaller sizes with more FIXINGS per square metre. Beautiful strong shadow line. Best used in Severe Exposure sites. Much sought after for their RUSTIC slate appearance.
